

SITEC

QUALITY POLICY

The company carry out the Design, Checking, Testing and Commissioning of processor and relay based Rail control systems internationally.

The Directors of the company consider the quality aspects of our operations to be of primary importance.

Customer satisfaction ensures the continuity and prosperity of the company and is thus a key measure of our success and development.

It is, therefore, company policy to establish and maintain an effective Integrated Management System which is planned, developed and implemented in all areas of the company, to enable customer satisfaction and compliance with appropriate internal and external Standards.

All our employee and contractors are trained to effectively implement our Integrated Management System and it is the company's policy to seek continuous improvement in everything we do. The company measures the effectiveness of the business objectives through the Management Review and Internal Audit process.

The achievement of quality is fundamental to all activities carried out within the company and will be practiced by its Directors, Managers and all employees as an integral part of their daily work.

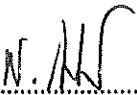

The company employs a Quality Manager (Health, Safety, Quality & Environment Manager) in order to ensure that it is adequately discharging its responsibilities for managing the quality issues relating to employees, contractors and the public.

The Directors of the company for the continual improvement of quality have developed and issued Objectives for the management of quality, these can only be achieved through the support and co – operation of employees, contractors and all other persons who work for us.

The Directors are committed to maintaining and as far as practicable exceeding the requirements of ISO 9001:2000

The contents of this statement will be kept up to date to reflect the changes in the nature of the activities and the size or complexity of the company. The Directors shall review its effectiveness as appropriate and in any case, at least annually.
